EDUCATION

B.Tech in Information Technology — ABES Engineering College, Ghaziabad	Nov 2023 – July 2027
Current CGPA: 6.49 Relevant Coursework: DSA, OOP, OS, DBMS, Web Technologies, AI/ML	
Class 12th — S.K.I.C, Mau, Uttar Pradesh	2021
Percentage: 78%	
Class 10th — S.K.I.C, Mau, Uttar Pradesh	2019
Percentage: 82.3%	

TECHNICAL SKILLS

Languages: C, C++, Java, Python, JavaScript, HTML5, CSS3, SQL

Frameworks & Libraries: ReactJS, Node.js (basics), Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn

AI / ML: Logistic Regression, Random Forest, Decision Tree, Supervised Learning, Feature Engineering, Prompt Engineering (basics), LangChain (basics)

Databases: MySQL, Firebase (NoSQL), REST APIs

Cloud & DevOps: AWS Cloud (Fundamentals), Docker (basics), GitHub Pages, Vercel

Developer Tools: Git, GitHub, VSCode, IntelliJ IDEA, Arduino IDE, BLYNK IoT, MATLAB, Proteus, LT Spice

Core Concepts: Data Structures & Algorithms, OOP, Operating Systems, DBMS, Agile Methodology, CI/CD basics

PROJECTS

Mental Health Prediction Using Machine Learning | Python, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn

- Engineered an end-to-end scalable ML pipeline to predict mental health conditions from survey datasets of 1,000+ records, covering full data science lifecycle from collection to deployment-ready model.
- Implemented and benchmarked three classification models (Logistic Regression, Random Forest, Decision Tree); Random Forest achieved 88% accuracy as the best-performing model.
- Performed robust preprocessing using Pandas — handled missing values, categorical encoding, and feature scaling — reducing data noise by ~25% and improving model stability.
- Built feature importance visualizations using Matplotlib and Seaborn, improving model interpretability by 30% and enabling data-driven insight extraction.

TechNova Solutions — Full-Stack Corporate Web App | HTML5, CSS3, JavaScript, Git, GitHub Pages

- Designed and deployed a responsive corporate landing page with dark-mode glassmorphism UI, custom CSS animations, and a JavaScript-validated contact form with fully mobile-first layout.
- Implemented CSS Flexbox & Grid for cross-device responsiveness; consistent rendering across Chrome, Firefox, and Safari with zero layout breakage.
- Deployed live via GitHub Pages with Git version control, ensuring continuous integration of updates with zero downtime.

Live: rajeshydv07.github.io/TechNova/

AI Chatbot with LangChain + Gemini API (In Progress) | Python, LangChain, Gemini API, Streamlit

- Building a conversational AI chatbot leveraging LangChain and Google Gemini API for context-aware multi-turn dialogue; frontend powered by Streamlit for rapid deployment.
- Applying prompt engineering techniques and retrieval-augmented generation (RAG) basics to improve response accuracy and reduce hallucinations.

CERTIFICATIONS

- Machine Learning with Python** — IBM Developer Skills Network / CognitiveClass (2024)
- Power BI — 1-Day Workshop** — DUCAT, Ghaziabad (2024)
- AI Tools Workshop** — be10X (2024)

ACHIEVEMENTS & COMPETITIVE PROGRAMMING

- Solved 100+ DSA problems on LeetCode and GeeksforGeeks, covering arrays, linked lists, trees, graphs, and dynamic programming.
- Delivered a complete ML project lifecycle — data collection, preprocessing, model training, evaluation, and visualization — independently using Python and Scikit-learn.
- Improved debugging proficiency by systematically identifying and resolving logical and syntactical errors across Python and Java codebases, reducing bug resolution time by ~40%.
- Built TechNova as a production-grade web app from scratch — responsive, animated, deployed, and version-controlled — demonstrating end-to-end full-stack ownership.

ADDITIONAL INFORMATION

Languages: English (Professional), Hindi (Native) **Availability:** Immediate (Internships & Full-time Fresher Roles)

Open Source: Actively contributing to personal and public GitHub projects; open to open-source collaboration.
